An Italian innovative start up is preparing a project proposal for a Fast Track to Innovation. The company develops a novel formulation of dermatological cream containing tissue regenerative factors present in human platelets for the treatment of skin ulcers, including serious disorders, such as diabetic foot ulcers, pressure and leg ulcers. The start-up seeks two different partners: a contract manufacturing organization and a contract research organisation via research cooperation agreement.

A Swiss university is preparing a Eurostars proposal. The aim is to develop a system to improve patient adherence to therapy and correct lifestyle during cardiovascular rehabilitation and prevention programmes. The device shall be used as a personalised tracker for relevant parameters. R&D performing SMEs from the medical field with expertise in mobile apps, IoT and wearable sensors are sought for research cooperation. An SME for the commercialisation of the product will also be required.

Deadline for EOI: 10 Dec 2019

Deadline for Call: 13 Feb 2020
